Services

We are **AMG** Professional Services

About Us

With 30 years of experience with top companies, providing solutions of excellence in the domestic, regional and global markets.

We can implement new processes or methodologies for you to save your time, resources and costs.

All Our Services Include

Documentation of processes on demand (Existing process vs. improvement proposals) // Periodic monitoring and reporting of progress // Generation and maintenance of repository with information about activity // Training, Coaching & more...

Professional Services

For Activities both in the domestic, regional or global market, **AMG** provide the necessary support in terms of Human Resources, Materials and Final Results. Our responsibility is to provide the best solution to our Customers and their Business Processes.

Any activity that is executed in the Modern Enterprise, it can be considered a Project in itself. It has a beginning, an end, a workload that we need to make, it is expected a certain quality and represents a cost that must be assumed. Given these implications present, It is very important that people who have the responsibility of managing, have a complete view of the business, that is, in the language of business, a "end to end" vision. In **AMG** we believe we can add value to this process in your company, primarily on the following fronts:
